

Documentation Of Ajax Product Filter Premium

Installation of Ajax Product Filter Premium

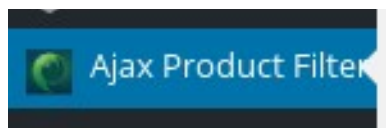

Installation

1. Install Word Press from http://codex.wordpress.org/Installing_WordPress.
2. Upload via FTP: - Unzip the zip archive you have downloaded on your computer. Upload the folder to your server via FTP into the directory plugins on your Word press installation (wp-content > plugins).
3. Upload via Word press Admin: - Go to your WordPress admin panel, and then to Plugins. Click on "Add New" and then upload the zip file of the plugin using the "Upload Plugin" button you can find on top of the screen.
4. For the plugin to work as it should, Woo Commerce plugin has to be installed and enabled.

Activation

Once you have uploaded the plugin, activate your plugin in **Plugins > Installed plugins**.

If it has been activated correctly, plugin control panel is available in the tab **Ajax Product Filter** in WordPress dashboard

General Settings

Ajax Product Filter

Setting Styling

Enable Ajax Product Filter

Note: "Selectors can be ID or Class: If ID use '#id_name' and if Class use '.class_name' "

Content Selector On Shop page (Default: .products)

Next Selector On Shop page (Default: .next)

Item Selector On Shop page (Default: .product)

Save

Advanced Styling Options

You can use these seven styling options for your website.

How to create Attributes.

- Select Attributes.

WooCommerce

Products

Products

Add Product

Categories

Tags

Attributes

Phoeniix

Appearance

Name for the attribute (shown on the front-end).

Slug

Unique slug/reference for the attribute; must be shorter than 28 characters.

Enable Archives?

Enable this if you want this attribute to have product archives in store.

Type

- Add new attribute.

WordPress 4.6 is available! [Please update now.](#)

Attributes

Add New Attribute

Attributes let you define extra product data, such as size or colour. You can use these attributes in the shop sidebar using the "layered nav" widgets. Please note: you cannot rename an attribute later on.

Name

Brand

Name for the attribute (shown on the front-end).

Slug

Unique slug/reference for the attribute; must be shorter than 28 characters.

Enable Archives?

Enable this if you want this attribute to have product archives in your store.

Name	Slug	Type	Order by	Terms
------	------	------	----------	-------

No attributes currently exist.

- Click on the "Add Attribute" button.

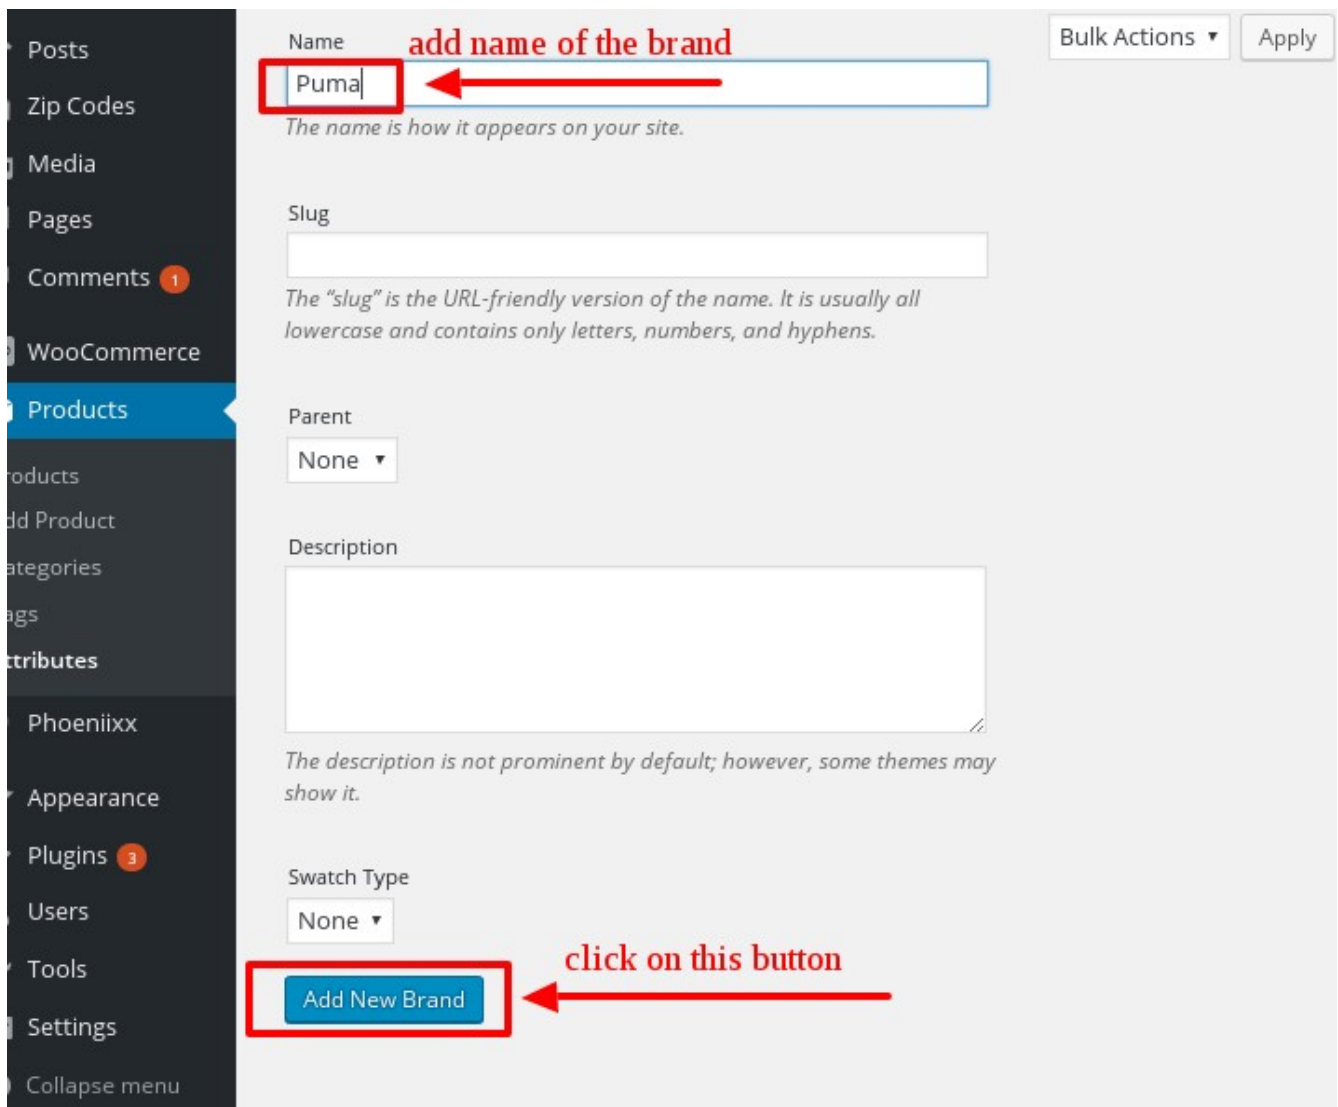

The screenshot shows the WordPress admin interface for adding a new attribute. The left sidebar contains navigation menus for Posts, Zip Codes, Media, Pages, Comments (1), WooCommerce, Products, Add Product, Categories, Tags, Attributes, Phoenixx, Appearance, Plugins (3), Users, Tools, Settings, and Collapse menu. The main content area is titled 'Name' and has a text input field containing 'Brand'. Below this is a 'Slug' input field. A checkbox labeled 'Enable Archives?' is present, with a note: 'Enable this if you want this attribute to have product archives in your store.' The 'Type' dropdown is set to 'Select'. A note explains: 'Determines how you select attributes for products. Under admin panel -> products -> product data -> attributes -> values, Text allows manual entry whereas select allows pre-configured terms in a drop-down list.' The 'Default sort order' dropdown is set to 'Custom ordering', with a note: 'Determines the sort order of the terms on the frontend shop product pages. If using custom ordering, you can drag and drop the terms in this attribute.' At the bottom, the 'Add Attribute' button is highlighted with a red box, and a red arrow points to it from the right.

- After creating the attributes, select the configure items option to create terms for the attributes.

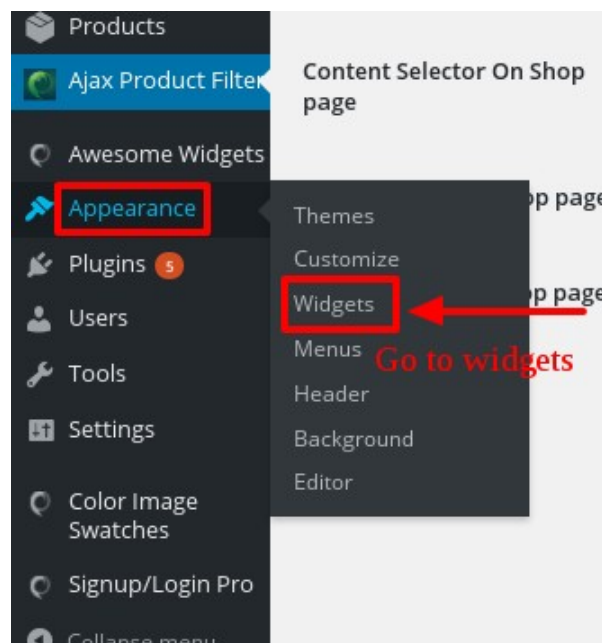

The screenshot shows the 'Attributes' management screen in WordPress. It features a table with the following columns: Name, Slug, Type, Order by, and Terms. The table contains two rows: 'Brand' and 'Pattern'. The 'Brand' row has 'brand' as the slug, 'Select' as the type, and 'Custom ordering' as the order by. The 'Terms' column for 'Brand' shows a red arrow pointing to a 'Configure terms' button with a gear icon, which is highlighted with a red box. The 'Pattern' row has 'pattern' as the slug, 'Select' as the type, and 'Custom ordering' as the order by. The 'Terms' column for 'Pattern' shows a gear icon.

Name	Slug	Type	Order by	Terms
Brand Edit Delete	brand	Select	Custom ordering	- Configure terms
Pattern	pattern	Select	Custom ordering	-

- Now add the terms to the attributes.

- Once created the attributes, then go to Appearance>Widgets.

Available Widgets

these highlighted Ajax Product are our widgets

To activate a widget drag it to a sidebar or click on it. To deactivate a widget and delete its settings, drag it back.
