

Documentation Of Color Swatches Plugin

Installation of Color Swatches Plugin

Installation

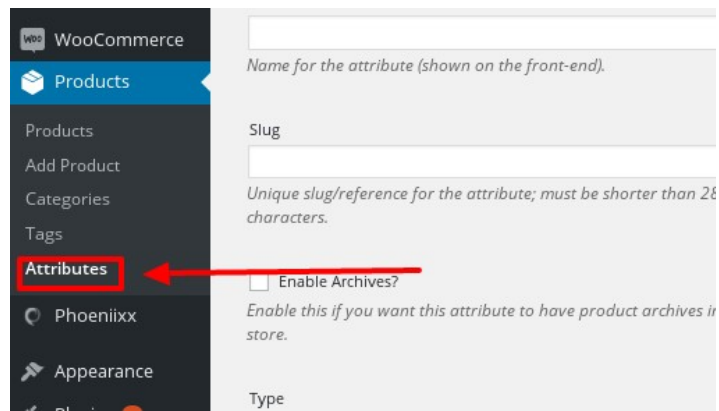

1. Install Word Press from http://codex.wordpress.org/Installing_WordPress.
2. Upload via FTP: - Unzip the zip archive you have downloaded on your computer. Upload the folder to your server via FTP into the directory plugins on your Word press installation (wp-content → plugins).
3. Upload via Word press Admin: - Go to your WordPress admin panel, and then to Plugins. Click on "Add New" and then upload the zip file of the plugin using the "Upload Plugin" button you can find on top of the screen.
4. For the plugin to work as it should, WooCommerce plugin has to be installed and enabled.

Activation

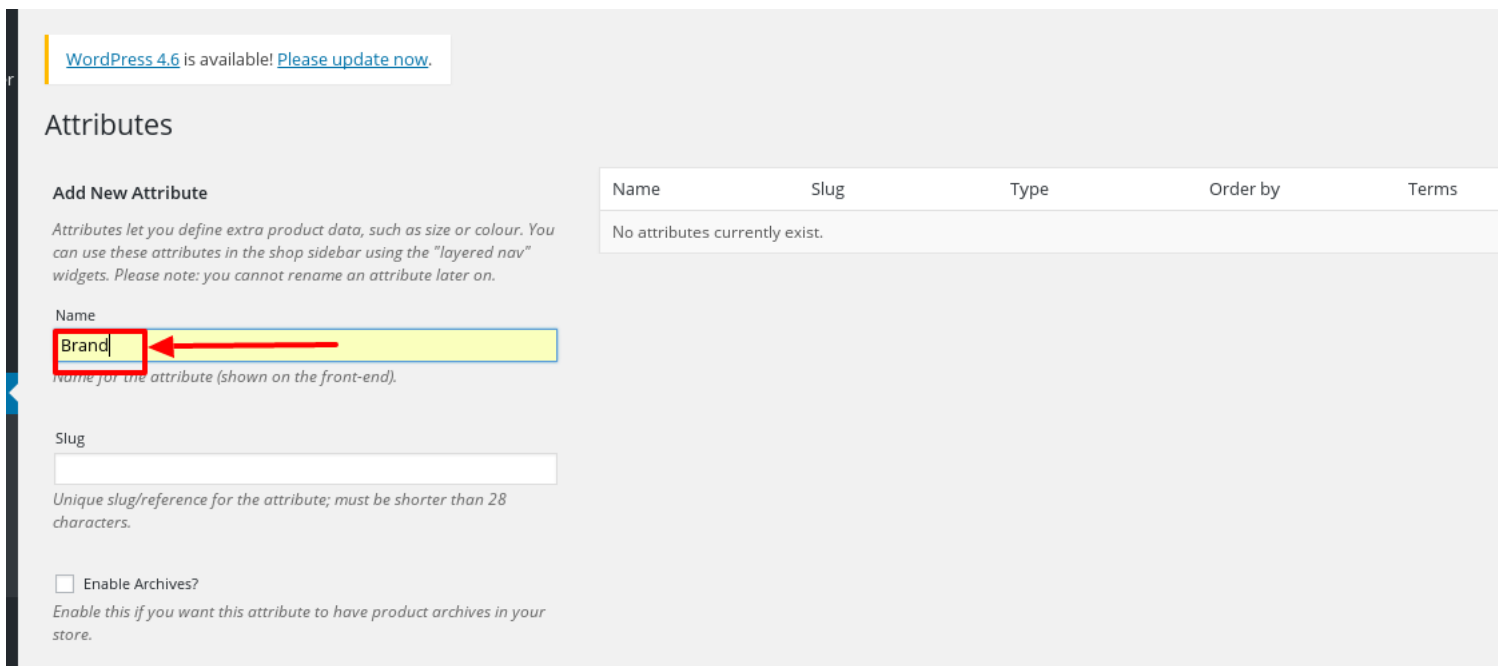

Once you have uploaded the plugin, activate your plugin in Plugins > Installed plugins. If it has been activated correctly, plugin control panel is available in the tab **Phoeniix → Color and Image Swatches** in Word Press dashboard.

How to create Attribute?

- Select attributes.

- Add new attribute.

- Click on the “Add Attribute” button.

The screenshot shows the WordPress admin interface for adding a new attribute. The left sidebar contains navigation menus for Posts, Zip Codes, Media, Pages, Comments (1), WooCommerce, Products, Add Product, Categories, Tags, Attributes, Phoenixx, Appearance, Plugins (3), Users, Tools, Settings, and Collapse menu. The main content area is titled 'Name' and contains a text input field with 'Brand' entered. Below this is a 'Slug' field, an 'Enable Archives?' checkbox, a 'Type' dropdown menu set to 'Select', and a 'Default sort order' dropdown menu set to 'Custom ordering'. The 'Add Attribute' button is highlighted with a red box, and a red arrow points to it from the right.

- After creating the attributes, select the configure items option to create terms for the attributes.

The screenshot shows a table of attributes in the WordPress admin interface. The table has columns for Name, Slug, Type, Order by, and Terms. The 'Brand' attribute is highlighted, and the 'Configure terms' button is highlighted with a red box. A red arrow points from the 'Terms' column to the 'Configure terms' button.

Name	Slug	Type	Order by	Terms
Brand Edit Delete	brand	Select	Custom ordering	-
Pattern	pattern	Select	Custom ordering	-

- Now add the terms to the attributes and select the swatch type.

Add New Brand

Create variations from all attributes Go

- Then add the variation by giving the SKU and the price to the products.
- Then save the changes.
- Finally update the product.

The screenshot shows a product variation management interface. On the left is a sidebar with navigation options: Shipping, Linked Products, Attributes, Variations (selected), Advanced, and Frequently Bought Together. The main area is titled 'Add variation' and includes a 'Go' button and a link to '4 variations (Expand / Close)'. Below this, the product details are shown: '#1921 Nike' and 'Blue'. A red box highlights the 'SKU' field, which contains 'V11', with a red arrow pointing to it. Below the SKU field are checkboxes for 'Enabled' (checked), 'Downloadable', 'Virtual', and 'Manage stock?'. The 'Regular price (₹)' field is highlighted with a red box and contains '12', with a red arrow pointing to it. The 'Sale price (₹)' field is empty and has a 'Schedule' link. Below the price fields is an 'In stock' dropdown menu. The 'Weight (kg)' field contains '0', and the 'Dimensions (L×W×H) (cm)' fields contain '0', '0', and '0'. The 'Shipping class' dropdown menu is set to 'Same as parent'.

- This will be look like this in your product page.
